Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abrasives

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Accident prevention

The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).

Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Accidents

Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Adaptive systems

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).

Algorithms

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).

Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).

Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Architecture

Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Arizona

Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).

Artificial intelligence

Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).

Asphalt pavements

Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).

Assets

Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).

Augers

Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).

Australia

Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Automated

Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).

Automation

Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).

Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Bearing capacity

Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Bench marks

Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).

Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).

Benefit cost ratios

Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).

Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Bids

Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).

Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).

Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).

Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Bored piles

Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).

Bridge construction

Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of High-

Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abrasives

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Accident prevention

The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).

Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Accidents

Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Adaptive systems

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).

Algorithms

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).

Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).

Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Architecture

Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Arizona

Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).

Artificial intelligence

Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).

Asphalt pavements

Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).

Assets

Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).

Augers

Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).

Australia

Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Automated

Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).

Automation

Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).

Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Bearing capacity

Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Bench marks

Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).

Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).

Benefit cost ratios

Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).

Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Bids

Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).

Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).

Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).

Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Bored piles

Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).

Bridge construction

Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of High-

way Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).

Bridges, highway

Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).

Brittle failure

Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Build/Operate/Transfer

Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).

Build/operate/transfer

Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).

Build/Operate/Transfer

Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).

Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).

Build/operate/transfer

Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Build/Operate/Transfer

Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).

Building design

Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).

Buildings, multistory

Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Buildings, residential

Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).

Business administration

Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Capital improvement

Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).

Case reports

Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Centrifuge model

Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Change management

Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).

Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).

Change orders

Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

China

Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).

Claims

Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).

Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).

Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (2005).

Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).

Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Coastal management

Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Community relations

E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).

Competition

Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Computer aided design

Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Computer aided drafting (CAD)

Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Computer aided instruction

General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).

Computer aided operation

Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Computer aided scheduling

Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).

Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).

Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

Computer aided simulation

Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).

Computer applications

Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (2005).

Computer models

CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).

Computer programming

Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Computer software

Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Concrete construction

Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).
Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).

Concrete pavements

Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Concrete placing

Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Constraints

Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Constructability

Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).
Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).
Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).
Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Construction

Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).
Paradigm Shift in Construction Education is Vital for the Future of Our Profession. — Leonhard E. Bernold; 131(5), 533-9 (N) (2005).
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).

Construction costs

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).
Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Construction equipment

Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).

Construction industry

Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).
A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).
Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).
Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).
Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).
The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).
Impact of Perceived Leadership Styles on Work Outcomes: Case of Building Professionals. — Antony T. S. Chan and Edwin H. W. Chan; 131(4), 413-22 (2005).
Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).
Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).
Assessing State Transportation Agency Constructa-

bility Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).
Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).
International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).
Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).
Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).
Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).
Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Construction management

Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).
Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).
Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).
Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).
Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).
Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).
Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (N) (2005).
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).
Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).
Measuring Quality of Writing of Construction Specifications. — G. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (2005).
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).

Construction materials

Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).

Construction methods

Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Construction planning

EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).

Construction site accidents

The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).
Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).
Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).

Construction sites

Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Consultants

Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).

Consulting services

Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Contactors

Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).

Contract management

Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).

Contractors

A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).
Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).
Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (2005).

Contracts

Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).
Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Control methods

Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Cost analysis

Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).

Cost control

Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).
Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).

Cost estimates

International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).
Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).
Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Costs

Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

Cranes

Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Critical path method

Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (N) (2005).
Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).
Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).

Damage

Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).

Data analysis

Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Data collection

Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).
Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Databases

Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).
Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Decision making

Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).
A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).
Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).

Decision support systems

Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).
Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Decision theory

Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Decommissioning

Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).
Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Delay time

Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (2005).
Method for Calculating Schedule Delay Consider-

ing Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).

Delivery
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).

Delphi method
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).

Design
Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).
Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Design/build
Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).

Design/build
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

Differential settlement
Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).

Dispute resolution
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).

Documentation
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).

Drilling
Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).

Earthmoving
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).

Economic analysis
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).

Egypt
Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

Electrical systems
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).

Elevation
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Elevators
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Employees
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Engineering education
General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).
Paradigm Shift in Construction Education is Vital for the Future of Our Profession. — Leonhard E. Bernold; 131(5), 533-9 (N) (2005).
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).
Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Engineering firms
International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).

Engineering services
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Environmental issues
EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).
Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (2005).

Estimation
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).

Evaluation
A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).

Evolutionary computation
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).

Excavation
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Expert systems
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).

Facilities
Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).
Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Fast track construction
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Fatalities
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Feedback control
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Development and On-Site Evaluation of an Auto-

mated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Financial management

Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).

Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).

International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).

Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).

Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).

Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).

Financing

Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Forecasting

Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).

Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Foreign countries

International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).

Foreign projects

Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).

Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).

Formwork, construction

Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).

Fuzzy sets

Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordoñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).

A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).

Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).

Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).

Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).

Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).

Geographic information systems

Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Global positioning

Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).

Graphic methods

Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).

Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).

Gulf of Mexico

Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Highway construction

Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).

CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).

Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).

Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).

Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Hong Kong

Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).

Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).

Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).

Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Housing

Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).

Indonesia

Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Industrial plants

Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).

Information management

Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).

Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).

Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).

Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).

Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).

Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Information technology (IT)

Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Diffusion of Computer Aided Design Technology

in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).
Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Infrastructure
Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).
Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).
Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).
Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).

Injuries
The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Innovation
Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).
Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).
Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Insurance
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).

Integrated systems
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (2005).

Interfaces
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

International factors
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Internet
Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).

Investments
Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Knowledge-based systems
Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Labor
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Labor relations
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Lasers
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Leadership
Impact of Perceived Leadership Styles on Work Outcomes: Case of Building Professionals. — Antony T. S. Chan and Edwin H. W. Chan; 131(4), 413-22 (2005).

Lean construction
Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).

Learning
Paradigm Shift in Construction Education is Vital for the Future of Our Profession. — Leonhard E. Bernold; 131(5), 533-9 (N) (2005).

Least-squares method
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Light
CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).

Light, artificial
Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Linear programming
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Litigation
Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Load distribution
Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Losses
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).

Management methods
Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).

Market research

Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Materials

Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Measurement

Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).

Measuring Quality of Writing of Construction Specifications. — G. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).

Mechanical systems

Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

Minority groups

Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).

Models

Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).

Modular structures

Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Monitoring

Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).

Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Monte Carlo method

Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).

Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).

Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).

Motivation

Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).

Neural networks

Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).

Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).

Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).

Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Nighttime construction

CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).

Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Numerical analysis

Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Occupational safety

The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).

Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).

Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).

Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).

Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).

Occupational Safety and Health Administration

Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Offshore platforms

Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Optimization

Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).

Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).

Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).

Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).

Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).

Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Optimization models

Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Organizations

Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Owners

Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).

Partnership
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).

Partnerships
Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).
Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Pavements
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).

Performance characteristics
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).

Performance evaluation
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).

Personnel management
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Photogrammetry
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Pile foundations
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).

Piles
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).

Planning
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Plumbing
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Poisson density functions
Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).

Pollution control
EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).

Post tensioning
Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Predictions
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).

Prefabrication
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Pricing
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Private sector
Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).

Privatization
Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).
Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).

Probability
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).

Probability density function
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Probability density functions
Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).

Probability distribution
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Procurement
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Production engineering
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).

Production planning
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).

Productivity
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Describing a Beta Probability Distribution Func-

tion for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (2005).
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Professional development

Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).
Impact of Perceived Leadership Styles on Work Outcomes: Case of Building Professionals. — Antony T. S. Chan and Edwin H. W. Chan; 131(4), 413-22 (2005).
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).

Professional role

Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Project evaluation

Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).

Project management

Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).
Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordoñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).
Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).
Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).
Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).
Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).
Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).
Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Project selection
Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).
Public participation
E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).
Quality control
Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (2005).
Quantitative analysis
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).
Reconstruction
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).
Regression models
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).
Regulations
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).
Rehabilitation
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).
Residential location
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Resource allocation
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (N) (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).
Resource management
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Risk analysis
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).
Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).
Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).
Risk management
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).
Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).
Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).
International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).
Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).
Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).
Road construction
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Roofs
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).
Safety
Use of Trench Boxes for Worker Protection. — Jimmie Hinze; 131(4), 494-500 (2005).
Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).
Safety analysis
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).
Scheduling
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).
Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (N) (2005).
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Atha-

nasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).

Security
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).

Shoring
Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).

Silos
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).

Simulation
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).
Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Simulation models
Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).
General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).

Singapore
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).

Site evaluation
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Site preparation, construction
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).

Slabs
Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Specifications
Measuring Quality of Writing of Construction Specifications. — G. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).

Stability
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Standards
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (2005).

Statistical analysis
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).

Statistical models
Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).

Statistics
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Steel construction
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).

Stochastic models
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

Stochastic processes
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Structural design
Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Subcontractors
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).

Subsurface environment
Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).

Supervision
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Sustainable development
E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).
Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).

Teaching
Paradigm Shift in Construction Education is Vital for the Future of Our Profession. — Leonhard E. Bernold; 131(5), 533-9 (N) (2005).

Teamwork
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Theories
Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Three-dimensional models
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Time factors
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Atha-

nasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Time studies

Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Toll roads

Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Towers

Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).

Training

Use of Trench Boxes for Worker Protection. — Jimmie Hinze; 131(4), 494-500 (2005).

Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).

Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).

Transportation planning

Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).

Trenches

Use of Trench Boxes for Worker Protection. — Jimmie Hinze; 131(4), 494-500 (2005).

Tunnel construction

Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Tunneling

Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Turkey

Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).

Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

U.S. Navy

Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Uncertainty analysis

Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).

Uncertainty principles

Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

United Kingdom

Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Urban areas

E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).

Utilities

Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).

Value engineering

Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).

Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).

Water jets

Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Workspace

CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).

Writing

Measuring Quality of Writing of Construction Specifications. — G. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).

Author Index

Abdelhamid, Tariq S.
Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Abdel-Razek, Refaat H.
Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

AbouRizk, S.
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).
Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

AbouRizk, Simaan M.
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).

Abraham, Dulcy M.
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).

Abudayyeh, Osama
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Acharya, Nirmal Kumar
Discussion of "Factors Affecting the Success of a Construction Project" by Albert P. C. Chan, David Scott, and Ada P. L. Chan. — Nirmal Kumar Acharya and Young-Dai Lee; 131(6), 748 (2005).

Al-Hussein, Mohamed
Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).

Ali, Amal E.
Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).

Alkass, Sabah
Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).

Al-Sobiei, Obaid Saad
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).

Ammar, Mohammad A.
Discussion of "Flexible Model for Time/Cost Tradeoff Problem" by John Moussourakis and Cengiz Haksever. — Mohammad A. Ammar; 131(8), 942 (2005).

Arditi, David
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).
International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).
Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Ariaratnam, Samuel T.
Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).

Arikan, Metin
Closure to "Optimal Capital Structure Model for BOT Power Projects in Turkey" by Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong. — Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong; 131(3), 386-7 (2005).

Assem, Ihab
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).

Bakatjan, Sandalkhan
Closure to "Optimal Capital Structure Model for BOT Power Projects in Turkey" by Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong. — Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong; 131(3), 386-7 (2005).

Ballard, Glenn
Discussion of "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — Glenn Ballard, Lauri Koskela, Gregory A. Howell, and Iris D. Tommelein; 131(5), 615-6 (2005).

Bashford, Howard H.
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).

Behm, Michael
Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).

Berg, Robert
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).

Berkovich, O.
Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Bernold, Leonhard E.
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).
Paradigm Shift in Construction Education is Vital for the Future of Our Profession. — Leonhard E. Bernold; 131(5), 533-9 (X) (2005).
Automatic As-Built Generation with Utility Trenchers. — Leonhard E. Bernold; 131(6), 740-7 (2005).
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).

Birgonul, M. Talat
Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).
Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Björnsson, Hans C.
Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Bogus, Susan M.
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).

Borg, Robert F.
Discussion of "Master Builder Project Delivery System and Designer Construction Knowledge" by J. K. Yates and Leslie C. Battersby. — Robert F. Borg; 131(4), 501 (2005).

Brodetskaia, I.
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Brown, Audrick, IV
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).

(Bud) Griffis, F. H.
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Byrd, Robert C.
Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Carr, Paul G.
Investigation of Bid Price Competition Measured through Prebid Project Estimates, Actual Bid Prices, and Number of Bidders. — Paul G. Carr; 131(11), 1165-72 (2005).

Castañeda, Jorge A.
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).

Cha, Hee Sung
Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).

Chan, Ada P. L.
Closure to "Factors Affecting the Success of a Construction Project" by Albert P. C. Chan, David Scott, and Ada P. L. Chan. — Albert P. C. Chan, David Scott, and Ada P. L. Chan; 131(6), 748-9 (2005).

Chan, Albert P. C.
Closure to "Factors Affecting the Success of a Construction Project" by Albert P. C. Chan, David Scott, and Ada P. L. Chan. — Albert P. C. Chan, David Scott, and Ada P. L. Chan; 131(6), 748-9 (2005).

Chan, Antony T. S.
Impact of Perceived Leadership Styles on Work Outcomes: Case of Building Professionals. — Antony T. S. Chan and Edwin H. W. Chan; 131(4), 413-22 (2005).

Chan, Edwin H. W.
Impact of Perceived Leadership Styles on Work Outcomes: Case of Building Professionals. — Antony T. S. Chan and Edwin H. W. Chan; 131(4), 413-22 (2005).

Chan, Weng Tat
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

Chang, Luh-Maan
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).

Charles, Marcia
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Chassiakos, Athanasios P.
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Chen, Chuan
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

Chen, Dong
Closure to "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — H. Randolph Thomas, Michael J. Horman, R. Edward Minchin, Jr., and Dong Chen; 131(5), 616-7 (2005).

Chen, Hong-Long
Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).

Chen, Zhen
EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).

Cheng, Eddie W. L.
Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).

Chester, Mikhail
Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).

Cheung, Sai On
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).

Chew, David A. S.
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Choi, Sang D.
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Chotibhongs, Ranon
Issues in Subcontracting Practice. — David Arditi and Ranon Chotibhongs; 131(8), 866-76 (2005).

Chua, D. K. H.
Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).
Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).

Chua, David Kim Huat
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).

Connolly, Joseph P.
Discussion of "Electronic-Based Procedure for Managing Unbalanced Bids" by Wei-Chih Wang. — Joseph P. Connolly; 131(9), 1037-8 (2005).

Cox, Robert F.
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).

Dai, Jiukun
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).

Darren Graham, L.
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

de la Garza, Jesús M.
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (X) (2005).

Diekmann, James E.
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).

Dikmen, Irem
Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Diller, Brenton E.
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

Dunlop, Paul
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Dunston, Phillip S.
Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).
Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Dzeng, R. J.
Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Eastham, Danelle L.
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).

Edwards, David J.
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Ekström, Martin A.
Valuing Flexibility in Architecture, Engineering, and Construction Information Technology Investments. — Martin A. Ekström and Hans C. Björnsson; 131(4), 431-8 (2005).

Elazouni, Ashraf M.
Estimating the Acceptability of New Formwork Systems Using Neural Networks. — Ashraf M. Elazouni, Amal E. Ali, and Refaat H. Abdel-Razek; 131(1), 33-41 (2005).
Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Elbeltagi, Emad
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).

Eldin, Neil N.
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).

El-Diraby, T. E.
Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).
E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).

Elhakeem, Ahmed
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).

El-Rayes, Khaled
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).
CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).
Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).
Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Fagerlund, Walter R.
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Fayek, Aminah Robinson
Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (T) (2005).

Fente, Javier
Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).

Fisher, Deborah J.
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).

Fredericks, Tycho K.
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Gambatese, John
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Gambatese, John A.
Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).
Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).

Gao, Zhili
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Garrett, Thomas
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).

Georgy, Maged E.
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).

Gibson, G. Edward
Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Gil, Nuno
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).

Goh, Y. M.
Poisson Model of Construction Incident Occurrence. — D. K. H. Chua and Y. M. Goh; 131(6), 715-22 (2005).

Goldenberg, Marat
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).

Goodrum, Paul M.
Differences in Occupational Injuries, Illnesses, and Fatalities among Hispanic and Non-Hispanic Construction Workers. — Paul M. Goodrum and Jiukun Dai; 131(9), 1021-8 (2005).

Gunhan, Suat
Factors Affecting International Construction. — Suat Gunhan and David Arditi; 131(3), 273-82 (2005).
International Expansion Decision for Construction Companies. — Suat Gunhan and David Arditi; 131(8), 928-37 (2005).

Gunnarsson, Hordur G.
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).

Haas, Carl T.
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).

Halpin, Daniel W.
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).

Han, Seung H.
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).

Hanna, Awad S.
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).

Harper, Douglas G.
Success of Supplier Alliances for Capital Projects. — Douglas G. Harper and Leonhard E. Bernold; 131(9), 979-85 (2005).

Harris, Richard Anthony
Closure to "United Kingdom Construction Claims: Views of Professionals" by Steve Scott and Richard Anthony Harris. — Steve Scott and Richard Anthony Harris; 131(11), 1246 (2005).

Harvey, John T.
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Hecker, Steven
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Hegab, Mohamed Y.
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).

Hegazy, Tarek
Graphical Approach for Manpower Planning in Infrastructure Networks. — Ahmed Elhakeem and Tarek Hegazy; 131(2), 168-75 (2005).
Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (T) (2005).

Hendrickson, Chris
Cost Impacts, Scheduling Impacts, and the Claims Process during Construction. — Mikhail Chester and Chris Hendrickson; 131(1), 102-7 (2005).
Discussion of "Is Construction Labor Productivity Really Declining?" by Eddy M. Rojas and Peerapong Aramvareekul. — Chris Hendrickson; 131(2), 269-70 (2005).

Herbsman, Zohar J.
Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).

Hildreth, John
Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Hinze, Jimmie
The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).
Use of Trench Boxes for Worker Protection. — Jimmie Hinze; 131(4), 494-500 (2005).
Theft and Vandalism on Construction Sites. — Robert Berg and Jimmie Hinze; 131(7), 826-33 (2005).

Hinze, Jimmie W.
Viability of Designing for Construction Worker Safety. — John A. Gambatese, Michael Behm, and Jimmie W. Hinze; 131(9), 1029-36 (2005).

Ho, H. K.
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).

Ho, Peter K. M.
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).

Horman, Michael J.
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).
Closure to "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — H. Randolph Thomas, Michael J. Horman, R. Edward Minchin, Jr., and Dong Chen; 131(5), 616-7 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).
Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).
Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).

Howell, Gregory A.
Discussion of "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — Glenn Ballard, Lauri Koskela, Gregory A. Howell, and Iris D. Tommelein; 131(5), 615-6 (2005).
Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Hu, B. Q.
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).

Huang, Xinyu
The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).

Huh, Youngki
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).

Hyari, Khalied
CONLIGHT: Lighting Design Model for Nighttime Highway Construction. — Khaled El-Rayes and Khalied Hyari; 131(4), 467-76 (2005).
Optimal Lighting Arrangements for Nighttime Highway Construction Projects. — Khaled El-Rayes and Khalied Hyari; 131(12), 1292-300 (2005).

Ibbs, C. W.
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).

Ibbs, William
Impact of Change's Timing on Labor Productivity. — William Ibbs; 131(11), 1219-23 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Irizarry, Javier
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).

Issa, Raja R. A.
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).

James, Jennifer S.
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Jaselskis, Edward
Editor's Note. — Edward Jaselskis; 131(6), 619-20 (2005).
Editor's Note. — Edward Jaselskis; 131(7), 751-2 (2005).
Editor's Note. — Edward Jaselskis; 131(8), 857-8 (2005).
Editor's Note. — Edward Jaselskis; 131(9), 943-4 (2005).
Editor's Note. — Edward Jaselskis; 131(10), 1043-4 (2005).
Editor's Note. — Edward Jaselskis; 131(11), 1145-6 (2005).

Jaselskis, Edward J.
Editor's Note. — Edward J. Jaselskis; 131(1), 1-2 (2005).
Editor's Note. — Edward J. Jaselskis; 131(2), 149-50 (2005).
Editor's Note. — Edward J. Jaselskis; 131(3), 271-2 (2005).
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).
Editor's Note. — Edward J. Jaselskis; 131(4), 389-90 (2005).
Editor's Note. — Edward J. Jaselskis; 131(5), 503-4 (2005).
Editor's Note. — Edward J. Jaselskis; 131(12), 1247-8 (2005).

Jiang, Genmou
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).

Jin, Xiao-Hua
Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).

Kaiser, Mark J.
Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).
Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Kajewski, Stephen L.
Multilevel Formwork Load Distribution with Post-tensioned Slabs. — Stephen L. Kajewski; 131(2), 203-10 (2005).

Kale, Serdar
Diffusion of Computer Aided Design Technology in Architectural Design Practice. — Serdar Kale and David Arditi; 131(10), 1135-41 (2005).

Kandil, Amr
Time-Cost-Quality Trade-Off Analysis for Highway Construction. — Khaled El-Rayes and Amr Kandil; 131(4), 477-86 (2005).

Kashif, K. F.
Distributed Ontology Architecture for Knowledge Management in Highway Construction. — T. E. El-Diraby and K. F. Kashif; 131(5), 591-603 (2005).

Katada, Toshiyuki
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Kazaz, Aynur
Determination of Quality Level in Mass Housing Projects in Turkey. — Aynur Kazaz and M. Talat Birgonul; 131(2), 195-202 (2005).

Kenley, Russell
Quantifying Levels of Wasted Time in Construction with Meta-Analysis. — Michael J. Horman and Russell Kenley; 131(1), 52-61 (2005).

Kerr, Daniel
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

Khalafallah, Ahmed
Trade-off between Safety and Cost in Planning Construction Site Layouts. — Khaled El-Rayes and Ahmed Khalafallah; 131(11), 1186-95 (2005).

Kilian, Jeffrey J.
Construction Litigation for the U.S. Naval Facilities Engineering Command, 1982–2002. — Jeffrey J. Kilian and G. Edward Gibson; 131(9), 945-52 (2005).

Kim, Jae-Jun
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Kim, Kyunghwan
Critical Path Method with Multiple Calendars. — Kyunghwan Kim and Jesús M. de la Garza; 131(3), 330-42 (2005).
Evaluation of the Resource-Constrained Critical Path Method Algorithms. — Kyunghwan Kim and Jesús M. de la Garza; 131(5), 522-32 (X) (2005).

Kim, Kyungrai
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).

Kim, Youngjae
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).

Kiziltas, Semiha
Prediction of Organizational Effectiveness in Construction Companies. — Irem Dikmen, M. Talat Birgonul, and Semiha Kiziltas; 131(2), 252-61 (2005).

Knutson, Kraig
Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).

Koblegard, Kristen
Management's Perception of Key Behavioral Indicators for Construction. — Robert F. Cox, Raja R. A. Issa, and Kristen Koblegard; 131(3), 368-76 (2005).

Kochendörfer, Bernd
Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Koskela, Lauri
Discussion of "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — Glenn Ballard, Lauri Koskela, Gregory A. Howell, and Iris D. Tommelein; 131(5), 615-6 (2005).

Kululanga, G. K.
Measuring Quality of Writing of Construction Specifications. — G. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).

Kumaraswamy, Mohan M.
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Lee, Dong-Eun
Probability of Project Completion Using Stochastic Project Scheduling Simulation. — Dong-Eun Lee; 131(3), 310-8 (2005).

Lee, Eul-Bum
Computer Simulation Model: Construction Analysis for Pavement Rehabilitation Strategies. — Eul-Bum Lee and C. W. Ibbs; 131(4), 449-58 (2005).
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Lee, Hyun-Soo
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Lee, Sang-Hoon
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).

Lee, SangHyun
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).

Lee, Young-Dai
Discussion of "Factors Affecting the Success of a Construction Project" by Albert P. C. Chan, David Scott, and Ada P. L. Chan. — Nirmal Kumar Acharya and Young-Dai Lee; 131(6), 748 (2005).

Li, Heng
EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).
Analytic Network Process Applied to Project Selection. — Eddie W. L. Cheng and Heng Li; 131(4), 459-66 (2005).

Ling, Florence Yean Yng
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).

Ling, Yean Yng
Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).

Liu, Min
Modeling a Contractor's Markup Estimation. — Min Liu and Yean Yng Ling; 131(4), 391-9 (2005).
Improved Measured Mile Analysis Technique. — William Ibbs and Min Liu; 131(12), 1249-56 (2005).

Lo, S. M.
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).

Love, Peter E. D.
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Lueke, Jason S.
Surface Heave Mechanisms in Horizontal Directional Drilling. — Jason S. Lueke and Samuel T. Ariaratnam; 131(5), 540-7 (2005).

Martin, Jimmie
Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).

Martinez, Julio
Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Mattila, Kris G.
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Mayfield, John
Determination of Most Economical Scrapers Fleet. — Neil N. Eldin and John Mayfield; 131(10), 1109-14 (2005).

Mbabazi, Anania
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (T) (2005).

McManus, James F.
Assessing State Transportation Agency Constructability Implementation. — Phillip S. Dunston, John A. Gambatese, and James F. McManus; 131(5), 569-78 (2005).

Mei, Bing
Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Menches, Cindy L.
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).

Messner, John I.
Interface Management for China's Build–Operate–Transfer Projects. — Weng Tat Chan, Chuan Chen, John I. Messner, and David Kim Huat Chua; 131(6), 645-55 (2005).
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).

Metwally, Fikry Gomaa
Finance-Based Scheduling: Tool to Maximize Project Profit Using Improved Genetic Algorithms. — Ashraf M. Elazouni and Fikry Gomaa Metwally; 131(4), 400-12 (2005).

Minchin, R. Edward, Jr.
Closure to "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — H. Randolph Thomas, Michael J. Horman, R. Edward Minchin, Jr., and Dong Chen; 131(5), 616-7 (2005).

Mitropoulos, Panagiotis
Systems Model of Construction Accident Causation. — Panagiotis Mitropoulos, Tariq S. Abdelhamid, and Gregory A. Howell; 131(7), 816-25 (2005).

Mohamed, Y.
Technical Knowledge Consolidation using Theory of Inventive Problem Solving. — Y. Mohamed and S. AbouRizk; 131(9), 993-1001 (2005).
Application of the Theory of Inventive Problem Solving in Tunnel Construction. — Y. Mohamed and S. AbouRizk; 131(10), 1099-108 (2005).

Molenaar, Keith R.
Programmatic Cost Risk Analysis for Highway Megaprojects. — Keith R. Molenaar; 131(3), 343-53 (2005).
Concurrent Engineering Approach to Reducing Design Delivery Time. — Susan M. Bogus, Keith R. Molenaar, and James E. Diekmann; 131(11), 1179-85 (2005).

Moselhi, Osama
Change Orders Impact on Labor Productivity. — Osama Moselhi, Ihab Assem, and Khaled El-Rayes; 131(3), 354-9 (2005).
Optimization Algorithm for Selection and on Site Location of Mobile Cranes. — Mohamed Al-Hussein, Sabah Alkass, and Osama Moselhi; 131(5), 579-90 (2005).
Discussion of "United Kingdom Construction Claims: Views of Professionals" by Steve Scott and Richard Anthony Harris. — Osama Moselhi; 131(11), 1245-6 (2005).

Mukherjee, Amlan
General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).

Myers, Donald S.
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Nassar, Khaled M.
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).
Using Weibull Analysis for Evaluation of Cost and Schedule Performance. — Khaled M. Nassar, Hordur G. Gunnarsson, and Mohamed Y. Hegab; 131(12), 1257-62 (2005).

Nassar, Walid M.
Evaluating Cost Overruns of Asphalt Paving Project Using Statistical Process Control Methods. — Khaled M. Nassar, Walid M. Nassar, and Mohamed Y. Hegab; 131(11), 1173-8 (2005).

Navon, R.
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).
Development and On-Site Evaluation of an Automated Materials Management and Control Model. — R. Navon and O. Berkovich; 131(12), 1328-36 (2005).

Ng, S. Thomas
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).

O'Brien, William J.
Assessing the Accuracy of Cash Flow Models: The Significance of Payment Conditions. — Hong-Long Chen, William J. O'Brien, and Zohar J. Herbsman; 131(6), 669-76 (2005).

Ock, Jong H.
Contractor's Risk Attitudes in the Selection of International Construction Projects. — Seung H. Han, James E. Diekmann, and Jong H. Ock; 131(3), 283-92 (2005).

O'Connor, James T.
Optimizing Implementation of Value Management Processes for Capital Projects. — Hee Sung Cha and James T. O'Connor; 131(2), 239-51 (2005).
Crew Production Rates for Contract Time Estimation: Bent Footing, Column, and Cap of Highway Bridges. — James T. O'Connor and Youngki Huh; 131(9), 1013-20 (2005).

Oduba, Ayodele
Predicting Industrial Construction Labor Productivity Using Fuzzy Expert Systems. — Aminah Robinson Fayek and Ayodele Oduba; 131(8), 938-41 (T) (2005).

Oliveros, Adriana V. Ordóñez
Fuzzy Logic Approach for Activity Delay Analysis and Schedule Updating. — Adriana V. Ordóñez Oliveros and Aminah Robinson Fayek; 131(1), 42-51 (2005).

Park, Hee-Sung
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).

Park, Moonseo
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).

Peña-Mora, Feniosky
Quality and Change Management Model for Large Scale Concurrent Design and Construction Projects. — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 131(8), 890-902 (2005).

Pheng, Low Sui
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (T) (2005).

Phng, Siew Ting
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).

Ping Ho, S.
Bid Compensation Decision Model for Projects with Costly Bid Preparation. — S. Ping Ho; 131(2), 151-9 (2005).

Polat, Gul
Managing Owner's Risk of Contractor Default. — Obaid Saad Al-Sobiei, David Arditi, and Gul Polat; 131(9), 973-8 (2005).

Price, A. D. F.
Measuring Quality of Writing of Construction Specifications. — C. K. Kululanga and A. D. F. Price; 131(8), 859-65 (2005).

Pulaski, Michael H.
Organizing Constructability Knowledge for Design. — Michael H. Pulaski and Michael J. Horman; 131(8), 911-9 (2005).
Continuous Value Enhancement Process. — Michael H. Pulaski and Michael J. Horman; 131(12), 1274-82 (2005).

Pulsipher, Allan G.
Cost of Site Clearance and Verification Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Jimmie Martin; 131(1), 117-26 (2005).
Cost of Abrasive Cutting in Decommissioning Operations in the Gulf of Mexico. — Mark J. Kaiser, Allan G. Pulsipher, and Robert C. Byrd; 131(1), 137-48 (2005).

Rahman, M. Motiar
Reconstructing Cultures for Relational Contracting. — Mohan M. Kumaraswamy, M. Motiar Rahman, Florence Yean Yng Ling, and Siew Ting Phng; 131(10), 1065-75 (2005).
Constructing Relationally Integrated Teams. — Mohan M. Kumaraswamy, Florence Yean Yng Ling, M. Motiar Rahman, and Siew Ting Phng; 131(10), 1076-86 (2005).
Relational Selection for Collaborative Working Arrangements. — M. Motiar Rahman and Mohan M. Kumaraswamy; 131(10), 1087-98 (2005).

Raz, Yoram
Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).

Riley, David R.
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).
Effects of Delivery Systems on Change Order Size and Frequency in Mechanical Construction. — David R. Riley, Brenton E. Diller, and Daniel Kerr; 131(9), 953-62 (2005).

Rojas, Eddy M.
Closure to "Is Construction Labor Productivity Really Declining?" by Eddy M. Rojas and Peerapong Aramvareekul. — Eddy M. Rojas; 131(2), 270 (2005).
General-Purpose Situational Simulation Environment for Construction Education. — Eddy M. Rojas and Amlan Mukherjee; 131(3), 319-29 (2005).

Ryu, Han-Guk
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Saccomanno, Frank
Modified But-For Method for Delay Analysis. — Anania Mbabazi, Tarek Hegazy, and Frank Saccomanno; 131(10), 1142-4 (T) (2005).

Sacks, R.
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Sakellaropoulos, Serafim P.
Time-Cost Optimization of Construction Projects with Generalized Activity Constraints. — Athanasios P. Chassiakos and Serafim P. Sakellaropoulos; 131(10), 1115-24 (2005).

Sargent, Joseph R.
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).

Sawhney, Anil
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).

Schexnayder, Cliff
Describing a Beta Probability Distribution Function for Construction Simulation. — Cliff Schexnayder, Kraig Knutson, and Javier Fente; 131(2), 221-9 (2005).

Schluter, Lynne
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).

Scott, David
Closure to "Factors Affecting the Success of a Construction Project" by Albert P. C. Chan, David Scott, and Ada P. L. Chan. — Albert P. C. Chan, David Scott, and Ada P. L. Chan; 131(6), 748-9 (2005).

Scott, Steve
Closure to "United Kingdom Construction Claims: Views of Professionals" by Steve Scott and Richard Anthony Harris. — Steve Scott and Richard Anthony Harris; 131(11), 1246 (2005).

Shapira, A.
Feasibility of Automated Monitoring of Lifting Equipment in Support of Project Control. — R. Sacks, R. Navon, I. Brodetskaia, and A. Shapira; 131(5), 604-14 (2005).

Shapira, Aviad
Comparative Analysis of Shoring Towers for High-Clearance Construction. — Aviad Shapira and Yoram Raz; 131(3), 293-301 (2005).
AHP-Based Equipment Selection Model for Construction Projects. — Aviad Shapira and Marat Goldenberg; 131(12), 1263-73 (2005).

Shen, L. J.
Key Constraints Analysis with Integrated Production Scheduler. — D. K. H. Chua and L. J. Shen; 131(7), 753-64 (2005).

Shen, L. Y.
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).

Shi, Jonathan
Exact Algorithm for Solving Project Scheduling Problems under Multiple Resource Constraints. — Genmou Jiang and Jonathan Shi; 131(9), 986-92 (2005).

Shin, Dongwoo
Delay Analysis Method Using Delay Section. — Youngjae Kim, Kyungrai Kim, and Dongwoo Shin; 131(11), 1155-64 (2005).

Shpatnitsky, Y.
Field Experiments in Automated Monitoring of Road Construction. — R. Navon and Y. Shpatnitsky; 131(4), 487-93 (2005).

Simonsen, Katy L.
Effect of Safety and Environmental Variables on Task Durations in Steel Erection. — Javier Irizarry, Katy L. Simonsen, and Dulcy M. Abraham; 131(12), 1310-9 (2005).

Singh, D.
A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).

Smith, Nigel John
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Smith, Simon D.
Lognormal Distribution Provides an Optimum Representation of the Concrete Delivery and Placement Process. — L. Darren Graham, Simon D. Smith, and Paul Dunlop; 131(2), 230-8 (2005).

Son, Jaeho
Determination of Haul Distance and Direction in Mass Excavation. — Jaeho Son, Kris G. Mattila, and Donald S. Myers; 131(3), 302-9 (2005).

Song, Jongchul
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Song, Lingguang
Quantifying Engineering Project Scope for Productivity Modeling. — Lingguang Song and Simaan M. AbouRizk; 131(3), 360-7 (2005).

Stout, Art
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).

Sturts, Carrie S.
Addressing Pricing: Value Bidding for Engineers and Consultants. — Carrie S. Sturts and F. H. (Bud) Griffis; 131(6), 621-30 (2005).

Suemasa, Naoaki
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Sullivan, Kenneth T.
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).
Factors Affecting Absenteeism in Electrical Construction. — Awad S. Hanna, Cindy L. Menches, Kenneth T. Sullivan, and Joseph R. Sargent; 131(11), 1212-8 (2005).

Tamate, Satoshi
Analyses of Instability in Mobile Cranes due to Ground Penetration by Outriggers. — Satoshi Tamate, Naoaki Suemasa, and Toshiyuki Katada; 131(6), 689-704 (2005).

Tan, Johnson H. K.
Integrating *ISO 9001* Quality Management System and *ISO 14001* Environmental Management System for Contractors. — Low Sui Pheng and Johnson H. K. Tan; 131(11), 1241-4 (T) (2005).

Tatum, C. B.
Building Better: Technical Support for Construction. — C. B. Tatum; 131(1), 23-32 (2005).

Tatum, Clyde B.
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Taylor, Craig S.
Impact of Extended Overtime on Construction Labor Productivity. — Awad S. Hanna, Craig S. Taylor, and Kenneth T. Sullivan; 131(6), 734-9 (2005).

Terry, Lani
The Nature of Struck-by Accidents. — Jimmie Hinze, Xinyu Huang, and Lani Terry; 131(2), 262-8 (2005).

Thomas, David
Integrated Design/Construction/Operations Analysis for Fast-Track Urban Freeway Reconstruction. — Eul-Bum Lee, John T. Harvey, and David Thomas; 131(12), 1283-91 (2005).

Thomas, H. Randolph
Closure to "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — H. Randolph Thomas, Michael J. Horman, R. Edward Minchin, Jr., and Dong Chen; 131(5), 616-7 (2005).
Fundamental Principles of Site Material Management. — H. Randolph Thomas, David R. Riley, and John I. Messner; 131(7), 808-15 (2005).
Role of Inventory Buffers in Construction Labor Performance. — Michael J. Horman and H. Randolph Thomas; 131(7), 834-43 (2005).
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Thomas, Stephen R.
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).

Tiong, Robert L. K.
A Fuzzy Decision Framework for Contractor Selection. — D. Singh and Robert L. K. Tiong; 131(1), 62-70 (2005).
Closure to "Optimal Capital Structure Model for BOT Power Projects in Turkey" by Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong. — Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong; 131(3), 386-7 (2005).
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Toleti, Pavan Kumar
Project Management Education and Training Process for Career Development. — Deborah J. Fisher, Lynne Schluter, and Pavan Kumar Toleti; 131(8), 903-10 (2005).

Tommelein, Iris D.
Embodying Product and Process Flexibility to Cope with Challenging Project Deliveries. — Nuno Gil, Iris D. Tommelein, Art Stout, and Thomas Garrett; 131(4), 439-48 (2005).
Discussion of "Improving Labor Flow Reliability for Better Productivity as Lean Construction Principle" by H. Randolph Thomas, Michael J. Horman, R. Edward Minchin Jr., and Dong Chen. — Glenn Ballard, Lauri Koskela, Gregory A. Howell, and Iris D. Tommelein; 131(5), 615-6 (2005).

Tse, Raymond Y. C.
Time–Cost Relationships in Australian Building Construction Projects. — Peter E. D. Love, Raymond Y. C. Tse, and David J. Edwards; 131(2), 187-94 (2005).

Tserng, H. P.
Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Tucker, Richard L.
Benchmarking of Construction Productivity. — Hee-Sung Park, Stephen R. Thomas, and Richard L. Tucker; 131(7), 772-8 (2005).
Web-Based Benchmarking System for the Construction Industry. — Sang-Hoon Lee, Stephen R. Thomas, and Richard L. Tucker; 131(7), 790-8 (2005).
Workers' Skills and Receptiveness to Operate Under the Tier II Construction Management Strategy. — Jorge A. Castañeda, Richard L. Tucker, and Carl T. Haas; 131(7), 799-807 (2005).

Uwakweh, Benjamin Obinero
Effect of Foremen on Construction Apprentice. — Benjamin Obinero Uwakweh; 131(12), 1320-7 (2005).

Vanegas, Jorge A.
Considering Prework on Industrial Projects. — Jongchul Song, Walter R. Fagerlund, Carl T. Haas, Clyde B. Tatum, and Jorge A. Vanegas; 131(6), 723-33 (2005).

Varadan, Priya
Benefit-Cost Metrics for Design Coordination of Mechanical, Electrical, and Plumbing Systems in Multistory Buildings. — David R. Riley, Priya Varadan, Jennifer S. James, and H. Randolph Thomas; 131(8), 877-89 (2005).

Vorster, Michael
Reduction of Short-Interval GPS Data for Construction Operations Analysis. — John Hildreth, Michael Vorster, and Julio Martinez; 131(8), 920-7 (2005).

Walsh, Kenneth D.
Production System Loading–Cycle Time Relationship in Residential Construction. — Howard H. Bashford, Kenneth D. Walsh, and Anil Sawhney; 131(1), 15-22 (2005).
International Comparison of Cost for the Construction Sector: Purchasing Power Parity. — Kenneth D. Walsh, Anil Sawhney, and Audrick Brown, IV; 131(2), 160-7 (2005).

Walters, Russell C.
Improving Transportation Projects Using Laser Scanning. — Edward J. Jaselskis, Zhili Gao, and Russell C. Walters; 131(3), 377-84 (2005).

Wang, B.
E-Society Portal: Integrating Urban Highway Construction Projects into the Knowledge City. — T. E. El-Diraby and B. Wang; 131(11), 1196-211 (2005).

Wang, W. C.
Automating Schedule Review for Expressway Construction. — R. J. Dzeng, H. P. Tserng, and W. C. Wang; 131(1), 127-36 (2005).

Wang, Wei-Chih
Closure to "Electronic-Based Procedure for Managing Unbalanced Bids" by Wei-Chih Wang. — Wei-Chih Wang; 131(9), 1038-41 (2005).

Wang, Xiangyu
Mixed Reality-Based Visualization Interfaces for Architecture, Engineering, and Construction Industry. — Phillip S. Dunston and Xiangyu Wang; 131(12), 1301-9 (2005).

Weinstein, Marc
Can Design Improve Construction Safety?: Assessing the Impact of a Collaborative Safety-in-Design Process. — Marc Weinstein, John Gambatese, and Steven Hecker; 131(10), 1125-34 (2005).

Wibowo, Andreas
Discussion of "Optimal Capital Structure Model for BOT Power Projects in Turkey" by Sandalkhan Bakatjan, Metin Arikan, and Robert L. K. Tiong. — Andreas Wibowo; 131(3), 385-6 (2005).
Discussion of "Concessionaire Selection: Methods and Criteria" by Xueqing Zhang. — Andreas Wibowo; 131(7), 854-6 (2005).
Financial Risk Analysis of Project Finance in Indonesian Toll Roads. — Andreas Wibowo and Bernd Kochendörfer; 131(9), 963-72 (2005).

Wiersma, Mike
Occupational Injuries and Fatalities in the Roofing Contracting Industry. — Tycho K. Fredericks, Osama Abudayyeh, Sang D. Choi, Mike Wiersma, and Marcia Charles; 131(11), 1233-40 (2005).

Wilmot, Chester G.
Neural Network Modeling of Highway Construction Costs. — Chester G. Wilmot and Bing Mei; 131(7), 765-71 (2005).

Wong, Conrad T. C.
EnvironalPlanning: Analytic Network Process Model for Environmentally Conscious Construction Planning. — Zhen Chen, Heng Li, and Conrad T. C. Wong; 131(1), 92-101 (2005).

Wong, Peter S. P.
Contractor as Trust Initiator in Construction Partnering—Prisoner's Dilemma Perspective. — Peter S. P. Wong, Sai On Cheung, and Peter K. M. Ho; 131(10), 1045-53 (2005).

Wu, Y. Z.
Risk Concession Model for Build/Operate/Transfer Contract Projects. — L. Y. Shen and Y. Z. Wu; 131(2), 211-20 (2005).

Xu, Tianji
Development Model for Competitive Construction Industry in the People's Republic of China. — Tianji Xu, Robert L. K. Tiong, David A. S. Chew, and Nigel John Smith; 131(7), 844-53 (2005).

Yang, I-Tung
Chance-Constrained Time–Cost Tradeoff Analysis Considering Funding Variability. — I-Tung Yang; 131(9), 1002-12 (2005).

Yiu, C. Y.
Performance Evaluation for Cost Estimators by Reliability Interval Method. — C. Y. Yiu, H. K. Ho, S. M. Lo, and B. Q. Hu; 131(1), 108-16 (2005).

Yng Ling, Florence Yean
Model for Fostering Trust and Building Relationships in China's Construction Industry. — Xiao-Hua Jin and Florence Yean Yng Ling; 131(11), 1224-32 (2005).

Yu, Jung-Ho
Method for Calculating Schedule Delay Considering Lost Productivity. — Hyun-Soo Lee, Han-Guk Ryu, Jung-Ho Yu, and Jae-Jun Kim; 131(11), 1147-54 (2005).

Zayed, Tarek M.
Productivity and Cost Assessment for Continuous Flight Auger Piles. — Tarek M. Zayed; 131(6), 677-88 (2005).
Pile Construction Productivity Assessment. — Tarek M. Zayed and Daniel W. Halpin; 131(6), 705-14 (2005).
Productivity and Cost Regression Models for Pile Construction. — Tarek M. Zayed and Daniel W. Halpin; 131(7), 779-89 (2005).

Zhang, Jing
Waste-Based Management in Residential Construction. — Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold; 131(4), 423-30 (2005).

Zhang, Kehui
Daily Windows Delay Analysis. — Tarek Hegazy and Kehui Zhang; 131(5), 505-12 (2005).
Keeping Better Site Records Using Intelligent Bar Charts. — Tarek Hegazy, Emad Elbeltagi, and Kehui Zhang; 131(5), 513-21 (2005).

Zhang, Lei
Prediction of Engineering Performance: A Neuro-fuzzy Approach. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 548-57 (2005).
Utility-Function Model for Engineering Performance Assessment. — Maged E. Georgy, Luh-Maan Chang, and Lei Zhang; 131(5), 558-68 (2005).

Zhang, Xueqing
Critical Success Factors for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 3-14 (2005).
Paving the Way for Public–Private Partnerships in Infrastructure Development. — Xueqing Zhang; 131(1), 71-80 (2005).
Criteria for Selecting the Private-Sector Partner in Public–Private Partnerships. — Xueqing Zhang; 131(6), 631-44 (2005).
Financial Viability Analysis and Capital Structure Optimization in Privatized Public Infrastructure Projects. — Xueqing Zhang; 131(6), 656-68 (2005).
Closure to "Concessionaire Selection: Methods and Criteria" by Xueqing Zhang. — Xueqing Zhang; 131(7), 856 (2005).
Concessionaire's Financial Capability in Developing Build-Operate-Transfer Type Infrastructure Projects. — Xueqing Zhang; 131(10), 1054-64 (2005).

Zheng, Daisy X. M.
Applying Pareto Ranking and Niche Formation to Genetic Algorithm-Based Multiobjective Time–Cost Optimization. — Daisy X. M. Zheng, S. Thomas Ng, and Mohan M. Kumaraswamy; 131(1), 81-91 (2005).
Stochastic Time–Cost Optimization Model Incorporating Fuzzy Sets Theory and Nonreplaceable Front. — Daisy X. M. Zheng and S. Thomas Ng; 131(2), 176-86 (2005).
